

Response (from the IT director):

Thank you for sharing your well-thought assessment of the issues around the GoGuardian Parent App. We have received a lot of feedback since announcing this planned implementation to our students and staff, and I will be drafting a FAQ document today to address the questions, comments and concerns. I wanted to let you know that I have turned off the monitoring aspect for student activity while we review and assess the feedback from our community. As it is currently configured, parents will be able to block specific websites for their students, and pause Internet access either on demand or at scheduled times, but they will not be able to view student browsing activity. Please feel free to reach out to me directly if you'd like to discuss in greater detail
